

DROIDRUSH 2k20

ABSTRACT SUBMISSION GUIDELINES

Abstract submission is **mandatory** for participation in DroidRush 2k20.

In the abstract document, you have to provide :

1. Team name and members information.
2. A description of the problem that you intend to solve and the solution you came up for that. This aims at presenting the app as a product/service. Do come up with a unique name!
3. The process flow of your app i.e. how your app is going to tackle the problem and its phases.
4. The features you have **thought** of implementing.
5. External libraries/APIs you are planning to use (if any).
6. You should also include **Class diagrams** in the abstract.
Paper/Pen or Any UML Tool can be used for creating class diagrams.
7. Since an abstract is a way of defining your ideas in a short and precise manner, **ensure you make an effective one**. The abstract also has weightage in DroidRush 2k20.
8. We only need a rough estimate of what you are planning to do and which features you are planning to implement. You can add or delete the features later on as per your wish.

[Here is the link to a sample abstract](#)

Upload your submission as a PDF in the format mentioned below

Filename : "TEAM NAME_YEAR_BTECH/MCA" (e.g. TEAM3_3rd_btech)

All the best :-)
